OUR LADY OF GRACE  
SIMCOE MUSKOKA CATHOLIC DISTRICT SCHOOL BOARD  
ANGUS, ON

PEARSON ENGINEERING LTD. completed full engineering consulting services as well as contract administration and inspection services for the 2.16 hectare Our Lady of Grace site located on Roth Street in Angus. The gymnasium and library portion of the existing school was retained and a new two storey section was added onto the remaining portion of the building. The original school had no storm controls and therefore had to be studied and design brought to standards. Detailed Stormwater Management design was completed including flood plain analysis for the project site as well as coordination with the Nottawasaga Valley Conservation Authority (NVCA).
